**Globe-Wernicke**  
Sectional Bookcases

ONCE books either overcrowded limited shelf space or empty shelves yawned and waited for books. When one bookcase overflowed, a new one was purchased, and its gaping shelves were gradually filled. That was before the Globe-Wernicke period in bookcases. Now, books and their shelves come together. The bookcase grows space with the library. This is the modern way of building a library. This is the Globe-Wernicke idea.

### Some New Fall Values

This season bids fair to be one of the best Separate Skirt seasons we have seen in five years. The qualities and styles shown are the best and of the largest variety that have been displayed in a number of seasons. The length of the separate coats brings the Skirt into prominence. The variety of popular cloths gives you an assortment so you can get just what you will want to go with whatever coat you may select.

We start the line at a special all Wool Serge Skirt that is made in a good style for only \$3.98. This is a good style and an extra value.

At \$5.50 and \$5.75 we have a large variety of styles that are made in Panamas, serges and novelty cloths. These are made in the season's best styles and are in a quality of material that we guarantee.

In the better qualities at from \$6.50 to \$12.00, we can show you some Skirt values that are sure to appeal to the trade as of a quality and style that it will be hard to duplicate.

### The New Coats and Suits

We are showing a large variety of the early Coat and Suit models. These are models that are new and entirely different and will appeal to the trade as some of the best and most noble styles they have ever seen. The Suit is different in many ways, the cloths are heavier and of a warmer nature than for many seasons. The length and lines of the Coat are entirely different, giving them a grace and style that makes them very attractive and popular.

The separate Coat is shown in the largest and most varied styles that have been shown in many seasons. The variety of popular models was never so great as are being shown this season. We can show you model after model, of neat, attractive styles, and yet each one carrying a distinctive style feature that is different. The new draped effect that is given to many of these Coat models makes them so much different than any previous season and in going through the line you will wonder how it is possible to get together so many handsome Coat models; but if you should go over such plants as the Wooltex, Blogg & Litteauer or Jacob Samuelson's, you would readily see how this would be possible. Every garment they put out is guaranteed for two seasons' wear. See the lines of Coats and Suits.

## A Competition

The Velour Hats are in sharp competition this season with the Black Velvets. Which will win? With either one of them you are sure to be modestly hatted.
